

ITEMS OF COST IN COAL MINING.

**How Expenses are Classified
Within Pit and
Outside.**

COMES NEARER TO INCOME

Derived From the Business Than In
Any Other Industrial Pursuit Min-
ing Men Say—Tremendous Amount
of Labor Required.

There are a great many cost items at every step in coal production. The cost at the face embraces not only the digging expense, but also expense for cross roads, opening walls, pick sharpening, timbering, etc. Under the heading of haulage comes expense for face driving, road driving, trapping, rope riding, haulage engineers, shovels, etc.

Drainage is an essential, but costly item, embracing expense for pump men, water bailers and pipe men who care for the pumping plants required for the safety of the mine. The bottom cost item in amount paid to mine foremen, fire bosses, tracklayers, cagers, mine car handlers, etc.

What is classed as the underground cost calls for the payment of large amounts for road repair work, grading, brushing and entry work, and other incidental items. Expenses for enter-

sancy are not included, although a cost for the work above ground is made up of the expenses of weighing, dumping, box car loading, switching, cleaning cars, top men, engineers, foremen, coal inspectors, railroad track work, repair cost, blacksmiths, carpenters, machinists, electricians and la-

vers.

The supply cost adds its quota to all these. These include mine car oil, stock feed, harness, replacement of stock killed or disabled, mangle rope repairs, electrical installation, steam supplies, drainage supplies, mine tim-ber, spikes, teaming and many other miscellaneous items.

There is hardly a business in which there are so many large items of ex-pense connected with the turning out of the product, and none in which ag-gregate expenses come so nearly up to the income derived from the busi-ness.

BOOSTING HOLMES

To Head the Newly Created Bureau of Mines.

Another distinguished delegation went to Washington this week to ask that Dr. J. A. Holmes of the Techno-logic Division of the Geological Survey, be appointed Director of the Bureau of Mines which will come into existence at the beginning of the fiscal year on July 1. The delegation was introduced to Secretary Ballinger by Senator Dick of Ohio, chairman of the Senate committee on mines and mining, to whose effort in the Senate the creation of the new bureau is due. The delegation was composed of A. C. Dinkin of Pittsburgh, President of the Carnegie Steel Company; Julian Ken-ney, metallurgical engineer of Pitts-burg, a brother of Representative Kennedy of Youngstown, O.; E. K. Morse, President of the Western Society of Engineers, and Mr. Davison, of the same organization; E. T. Taylor, chief mining engineer of the Pittsburgh Coal Company, and Prof. W. C. Phillips, chemist; Walter Williams of the Illinois Coal Operators' Association, Elenton, Ill.; Charles Schatz, of the Rock Island Coal Company, Chicago; A. W. Gibbs, superintendent of motive power of the Pennsylvania railroad, and H. M. Chance and F. L. Garrison, mining engineers of Philadelphia.

The members of the delegation spoke in the highest terms of the qualifications of Dr. Holmes for the place. They pointed out that he had orga-nized the rescue work in coal mines which has attracted so much attention that he has built up the laborator-work in which fuels are tested and also explosives, the latter with a view to assuring their relative safety in use in coal mines and that he has man-ifested structural tests which are an im-portant feature of the work that will be turned over to the new bureau. They pointed out that with Dr. Holmes in charge there will be no break or delay such as might ensue were a new man selected. Secretary Ballinger was apparently favorably impressed with their arguments. A number of the delegates will remain until to-morrow and see President Taft with regard to the appointment of Dr. Holmes.

EXPLOSIVES USED.

New Permissible Explosives Announced by Geological Survey.

During the last two years manufacturers have produced forty-five new explosives which have been officially pronounced comparatively safe and therefore permissible for use in blast-ing coal in gaseous or dusty mines. Prior to 1906 little information was available to coal operators or state mine inspectors relative to the ability of explosives to ignite coal dust, or coal gas and thereby to cause explosions, except the information or supposed information contained in the claims made by manufacturers of a few so-called safety powders. Early in 1910, under authority of an act of Congress making an appropriation for investigation of mine accidents, the United States Geological Survey un-de-took to test the explosives on the

market.

These investigations have stimu-lated the powder manufacturers to devise comparatively safe explosives and have resulted in the submission for in-vestigation by the Government at the Pittsburgh testing station of nearly 100 different explosives, of which 45 have now passed the government tests and have been listed as "permissible."

On May 15, 1909, the Geological Survey issued Explosives Circular No. 1 and on October 1, 1909, Explosives Cir-cular No. 2, giving lists of permissible explosives. On May 15, 1910, a third list was issued including all permissible explosives tested up to that date. This list shows that 14 additional explosives have been placed in the permissible class since the issue of Circular No. 2. These are as follows:

Etna coal powder, D. Etna Powder Company, Chicago, Ill.; Coal Speci-al No. 3-C, Keystone Powder Company, Emporium, Pa.; Eurokote, 2-L, F. Tunniliffe No. 6-L and Tunniliffe No. 8-L, F. G. Mc-Atee Powder & Company, Pitts-burg, Pa.; Titanite No. 3-P, Wagstaff Titanite Explosive Company, Corry, Pa.; Trodare coal powder, A. Trodare Powder Company, Allentown, Pa.; Detonite, Special Detonite Company, Clinton, Pa.; Mangold No. 3, Mangold No. 4, Mangold No. 2, E. A. du Pont de Nemours Powder Company, Wilmington, Del.; Kuhnestein Chem-ical Works, Pottsville, Pa.; Kanite, W. H., Kuhnestein Chem-ical Works, Pottsville, Pa.

CONNELLSVILLE REGION NOTES.

Many improvements are being made at Leisenring No. 2 plant. A new haulage has just been completed after consider-able tunneling was done and the shafts are now accessible.

A better system of haulage is being installed and an addition is being made to the hoist house. Metal ties have been laid under the large track and numerous improve-ments made around the shaft and me-chanical houses. This coke ovens has a large trade, so far as in accordance with its location, on a branch of the E. V. & C. branch of the Pennsylvania railroad. The sanitary condi-tions are also excellent, a matter which the popular superintendent, R. K. Waneck, gives close attention.

The Union Supply Company has moved its store at Altvorter. The sale item is a number of the business men are after what will make an ideal store room.

There are good prospects of the Monongahela railroad going through to Marietta, but there are possibil-iety of the project dropping through. The people in that section are anxious to see the extension made, a special com-mission has been appointed to pass over the M. R. R. Sunday and it is thought it had some interest in the extension.

James Henderson of Uniontown, general superintendent of the McKee-works at Martin, was attending to matters of business there last Tuesday.

Work along the river is a little slack at present. The plants are working out four or five days a week. Sunshine will soon add fifty ovens to their works with good prospects for more.

A large pump was installed at the Shamrock plant of the Fayette Coke Company last week for pumping the water out of the mine. One of the two electric mine motors met with an accident last week and is now shop-peed for repairs.

Extensive arrangements are being made to complete the long distance of Connellsville-Central Coke Company for the shipping of coal to that place from the Herbert plant in order to firing the ovens. The railroad side track is being built to a point in front of the ovens where huge steel and concreting storage bins are being erected. These bins will be nearing completion this summer and the coal will be transported to these bins and the coal handled in the mine cars to the triple width. It will be dropped into the barrels. One new hoist was also recently installed and many other improvements made around the mine and coke yard.

If you can find for sale 17 you have advertise it in The Weekly Courier.

LIST OF COKE OVENS IN The Connellsville District

With Their Owners, Address and Ovens in Blast Corrected to
Saturday, May 28, 1910.

Total Ovens	In Blast	Name of Works	Name of Operators	P. O. Address
262	180	Alma	W. J. Rainey	New York, N. Y.

THURSDAY MORNING, JUNE 2 1910

THE ANIMUS AND FOLLY OF
DEMOCRATIC TARIFF REVISION

The Democrats demand that the President shall call an extra session of Congress next March to revise the Tariff. The President will probably heed the demand. There are excellent reasons why he should ignore it, chief among which is the fact that the Payne-Aldrich bill has improved business conditions raised wages and promises prosperity if it is permitted to have a fair chance. It is unlikely to a fair trial and that is all the Republican party asks of the people. If after being properly tried out it appears in any of its component parts to be unjust, unwise or unkind to the interests of the country, the Republic can party can be trusted to properly revise it.

The cry of Tariff revision comes from a party which has in its years earned for itself the name of the Party of Opportunity. Its aim at a single measure in a single measure has been abandoned. Its efforts are directed solely to getting bills into power and to do so it is willing to stand on any platform or bestride any popular fence which promises to become a means to that end.

The Tariff issue has been taken up because the kicks of the insurgent element lead hope that a combination with them may split the Republican party and let the Democrats in power again. The Tariff issue is peculiarly acceptable because it is more in harmony with Democratic principles than any other issue. All the Democratic Tariff bills of recent years have reflected the principles of Protection and embodied those of Free Trade.

The Democrats would revise the Tariff law by a radical reduction of the duties of iron and steel and about one-third in wool. This justifies a proposal on the part of the Republicans to have a tariff on imports of major items and import taxes. It is difficult if not impossible for the chamber to include the removal of the duty on wool in the bill without reducing the cost of clothing, but an radical reduction of the duties on iron and steel would let in steel and iron furnaces, mills and shops which would mean a radical business depression, disaster and suffering. While it is undeniably true that the cost of living is high, it is also a fact that wages and labor were never higher than they are at this moment. Better pay for the workman which was set at high prices than low prices and little or no wages.

Prices are relative. Wages are high or low as their purchasing power is great or small. In spite of the noisy agitation on this question it remains an indubitable fact that the high cost of living is largely the cost of high living. The price of the fare he could afford him to look down upon and most cases to tell the truth of his failure in this statement by his own mother of living as compared with the man in which he lived ten years ago.

The Pittsburgh Gazette Times summed up the main topic when it said concerning the Tariff revision policies of the Democrats. "They will use the Wilson bill as a model rather than a tariff for revenue feature, may never end and they will exclude anything which carries a protectionist tinge. The brilliant is up on this, he made good we are allowed to pursue him abroad while labor cheaper the less it will cost us to live. They don't any doubt about that. But even with United States mills and steel's making it will be a good way to be idle or American goods just come down to the European basis."

The spirit of political unrest has been guilty of some serious offenses against the American people but none more uniformly injurious than the encouragement it has given from time to time to the peculiarities of the theories of the Democratic party. The election of a Democratic Congress will accomplish nothing in the way of Tariff revision but it will have the effect of furthering economic depression.

We do not live to chart the Democratic politicians, but we live within to practice the errors to their own skins on their own bodies when it looks like this. Some nations are so callous and cold that they would rather run the risk of being beaten than win the prize.

The "explosives" will not be long in back in the 60's this territory as numerous wells have been drilled for oil and gas and many failed to produce it. Wells were drilled in Bullskin, Sallie and Springfield, now in its and will be open for oil there.

COMMENCEMENT EXERCISES OF THE PERRY TWP. HIGH SCHOOL.

Splendid Orations and Papers by the Different Members of the Class Enthusiastically Received.

BOYS AND GIRLS ARE CREDIT

To the Public Schools of Fayette County and Graduate as Well Equipped as the Seniors of Many of the Large Town High Schools

PERRYOPOLIS, Pa., May 28.—The fifth annual commencement of the Perry High School was held here last evening and the largest class in the history of the school was graduated. The large auditorium was filled with friends of the class and lovers of education. Perhaps the interior of the auditorium never presented a more pleasing effect than it did last evening. Class colors and class flowers were displayed in profusion while the class motto "Rowing Not Drifting" was artistically arranged in blue and gold. The occasion was the most auspicious of the year and the school had ever enjoyed. The cooperation of directors, trustees, teachers and students was very marked by the harmonious greetings and applause. The popularity of the class was shown by the series of presents that received many of them hand-made and elaborate and the expression of the effects put forth in behalf of the class by the patron directors and faculty were made known in the valedictorian and material divisions.

The class headed by Rev. C. P. Sill lady County Superintendent C. G. Leiby and N. B. Leighleiter President B. W. Snyder marched from the second floor to the stage and the speaker of the assembly. After the invocation by Rev. Sallie who offered up a very appropriate and inspiring prayer the High School orchestra rendered several appropriate selections which were received by applause. The Salutatorian was delivered by Lewis Hamilton President of the class who has an appointment in the Military Cadet Band in the Virginia University to carry him through his college course. In his greeting remarks he dwelt upon high moral ideas embodied in a higher education and made a plea that aroused the best of all that is good within the minds of his hearers.

The Class History was rendered by Mary Duff and seldom have the past events of a class been linked up with such precision, enthusiasm and humor. After the applause died away Mrs. Hamilton delivered the English Classical oration the theme of which was taken from Ruskin's "Sister" and ladies and had reference to all the elements of an oratorial number. The appreciation of this number was shown by the applause. The concert solo by Russell Miller a member of the class was well received and put the hearts in a happy frame of mind to receive the class. W. H. delivered by Carl Thompson in which she depicted the material reminiscences and refers to those whom she thought best with much legal dignity. Her part in the program was very well taken.

The Class Oration by John Condero who will take up law in the West Virginia University next year was commented with logic and detection and the unanimous conclusion was that he will make good.

Mrs. Luise Caron then rendered a vocal solo which was received with much applause. In connection with the fun of the class Gertrude Stucke the Class Prophet showed her classmates to prominence in a very pleasing and artistic way. All recitations according to Miss Stucke's vision would have a member of the class of 1910 in its ranks in 20 years from now. She herself will enter West Virginia next fall to stand for train of nurse.

The next period on the program was taken up by Civile Drummon who recited the same oration that he did at State City last Friday evening when he won the medal in the interscholastic oratorical contest. In purity, propriety and precision this was a masterpiece and received much applause. Civile has a scholarship to enter college next fall. The eulogy on Mark Lewis was next delivered by William Ong and seldom has an American poet of humor been eulogized with more eloquence.

Hope was the subject chosen by Paul Forsythe for his oration and he too received much applause for his splendid effort in bringing on his status from the floor.

After a selection by the High School orchestra an excellent musical program was given together by Principal Stucke and composed of Ruth Willis pianist Edwin Hamilton cornet William Randolph clarinet Civile Drummon flute Roy Miller violin Paul Blair trumpet and Bill Miller slide trombone. Marie (the son) gave the class reading. This was a thrilling rendition and arose the dormitory emotions of the hearers in such manner that they were in a good mood to applaud the effort. Marie has been honored with a scholarship from Mt Union College of which institution she will enter next fall.

The Obituary Frances Bradley recited up the thoughts to succor persons that you could no see the hole and her endeavor put a little piece of sunshine in every person's soul. As usual this number was received most gracefully, and everybody was now ready to sit up and take notice to the Donor. A collection of appropriate

New Warrant is Out for Arrest of L. A. Howard

UNIONTOWN, May 25.—Another information charging embezzlement was sworn out against Attorney L. A. Howard of Connellsville this morning by County Detective Joe McBeth. Howard is present whereabouts are unknown but his father, S. H. Howard, who will appear at the proper time to answer the accusations against him.

McBeth acted for R. J. Hannan of Connellsville and the Lebanon Valley Building & Land Association. It is alleged that Howard was paid \$2,257 to satisfy certain judgments and losses against Hannan's property but appropriated this money for his own use.

The information charged an embezzlement of \$125 in connection with Mrs. Mrs. Cook is against Howard. When Mrs. Cook was told the money she lost through Howard she withdrew the information against him. No warrant was sworn out when District Attorney Henderson refused to stand for the settlement.

ARGUMENTS IN THE CAMPBELL DISPUTE.

Plaintiff Wants \$542.50 but Defendant Claims Expense Money.

VANDERGRIFT BAIL EXTENDED

Case in Juvenile Court Against George Hening is Continued—Another Judgment Entered Against the Summit Hotel Company.

UNIONTOWN, May 25.—Arguments were held before Judge Van Swaay this morning in the suit of George Campbell and others on the suit he had on the plaintiff to show that Mr. Campbell should not be allowed to file a bill of defense.

This case is a dispute over \$42,500 in his position of the plaintiff Frank Campbell's son and trustee to sell real estate. The property purchased by Frank Campbell who had 10 percent of the purchase money amount, to \$4,700. Campbell has filed in the suit he had between \$300 and \$1,000 of this sum on expenses which the plain object is to get a good interest in the work of the church. He was allowed to file a bill of defense.

The suit of James V. Anderson was granted until after the trial of his parents and H. J. of Pittsburg. On a daughter Miss Anna Fried also survives. Frank Campbell's son and trustee to the family interests. Standard of \$10,000 a day. The court set for the excuses of the plaintiff the defendant is invited to attend. Roy R. Wolf of the Methodist Episcopal Church will officiate in private.

In addition to her husband she is survived by the following grown children: I. B. C. and Miss E. B. Lee wife of George B. Lee of Connellsville, T. V. of Penn Ind. who recently turned 18 years old and her oldest children. She died with the child and when she was but a child and up until her health failed her she attended services regularly and displayed a great interest in the work of the church. She was a daughter of the late Jos. and Ida B. Lee and was of German descent. She was born and reared in the West Side and has lived in Connellsville for 78 years. Her only surviving sister Mrs. Mary Knob of Connellsville is in her ninetieth year. Mrs. Knob was a constant member of the Methodist Episcopal Church and was one of its oldest members. She died with the child and when she was but a child and up until her health failed her she attended services regularly and displayed a great interest in the work of the church. She was a daughter of the late Jos. and Ida B. Lee wife of George B. Lee of Connellsville, T. V. of Penn Ind. who recently turned 18 years old and her oldest children. WM. B. MINOR
DEAD, AGED 78.

Had Been Resident of Connellsburg for 25 Years.

WAS PIONEER OVEN BUILDER

Erected the Old Plants at Davidson and Trotter—Retired from Active Business Number of Years Ago. Sketch of His Life.

William B. Minor, aged 78 years, one month and eight days, a retired coke contractor, and well known in the coke regions throughout Fayette county, died on Friday afternoon at 2:30 o'clock at his late home No. 423 Johnston avenue. Mr. Minor had been in poor health for the past 18 months and two weeks ago today he contracted pneumonia which resulted in his death. The members of his family with the exception of a son, Lewis, were at his bedside when death came.

Decedent was a son of the late Hammell and Margaret Minor, whose death occurred over 20 years ago. He was born in North Union township near Uniontown, April 10, 1832. His boyhood days were spent in North Union township and the greater part of his life was spent in Fayette county. About 35 years ago Mr. Minor and family moved from Broad Ford to Trotter on a farm located where the H. C. Frick coke ovens are now located. Later he sold him farm to the H. C. Frick Coke Company and was awarded the contract for the building of the ovens. He also had the contract for the erection of the ovens at Morrell, Davidson and Broad Ford. After selling the farm at Trotter Mr. Minor moved his family into a new home on Johnston avenue where with his wife he was residing at the time of his death. He retired from active work about 10 years ago.

Decedent was twice married his first marriage being solemnized when he was but 20 years of age. Several years after the death of his first wife he married Mrs. Hattie Riven of Mill Run. Mr. Minor was a member of the Christian Church and was held in high esteem by his many friends. He was well versed in current events. His widow, three sons, John W., Lewis, prominent residents of Birmingham, Ala. J. A. L., and one daughter, Mrs. S. A. McClellan of Big Stone Gap, Va., and one step-daughter, Mrs. C. M. Miller of the West Side, survive. He is also survived by two sisters, Mrs. H. B. Shaffer of Connellsburg, and Miss Lucretia Minor of Pittsburgh. 14 grandchildren and eight great grandchildren. Funeral services were held from his late home on Sunday afternoon at 2 o'clock. Rev. C. M. Watson, pastor of the Christian Church officiated. Interment private in Hill Grove cemetery.

The active pallbearers were: Robert Norris, J. R. Davidson, C. M. Hyatt.

Coal Company in Somerset County Protests Against Condemnation.

SOMERSET, Pa., May 27.—Consolidated Coal Company has been appointed by the court at the instance of the Consolidation Coal Company, who had been advised by a three State mine inspectors named above that the use of open lamps in these mines was dangerous, and that their use should be discontinued owing to the presence of gas in the mines. The inspectors stated that gas was being generated in various parts of the mines and that it might be carried through the mine by the ventilating apparatus and cause an explosion. The inspectors also stated that the methods used by the miners in blasting were unsafe. After this report the company requested another inspection of the mines from Hon. James E. Rodger, chief of the State Department of Mines, which was granted, and the inspectors reported that there was gas in the mines but that safety lamps and permissible explosives were in use.

The mines in question are numbers 120 and 121 of the Consolidation Coal Company and are commonly known as Jenner Nos. 4 and 5. They are located in Jenner township, not far from Dossell. Mine Inspectors Nicholas Evans, C. B. Ross, of the Second Bituminous District, and Joseph Knapper of the Eighth Bituminous District made an examination of the mines, and aver that they found that they contained gas, whereupon they applied to the Court for the appointment of a board of examiners, and Frank B. Fluck, a civil engineer, Isaac Good of Somersett, and Frederick Rose of Meyerdale, well known coal operators and mine owners were appointed by the Court on May 5th. They, in company with Mine Inspector Evans, went upon the property and made an examination, and also took the testimony of several employees of these mines, among whom were R. A. Morgan, mine foreman, R. S. Larue, Inspector of mines, Frank Jans, consulting engineer, Robert Tarleton, Inspector of mines, C. M. Gilkitt, mine superintendent, Benjamin Hartle, fire boss, Joseph W. Reed, chemist, and C. E. Ed that in analyses of the air in the mines in question they found four times in question they found four tenths of one per cent of explosive gas, and state that five tenths to one per cent of such gas in the air of a mine is dangerous and liable to explode. The board of examiners also tested various parts of the mine, with safety lamps and report that they failed to find gas or fire damp in sufficient quantities to be detected by the safety lamps, and that the gas is not present in sufficient quantities in the mines to endanger life or health of the employees. The board further states that there is not sufficient gas to explode when in contact with an open lamp, and that there has been gas in the mines since the installation of the present system of ventilation.

Coal Company in Somerset County Protests Against Condemnation.

SOMERSET, Pa., May 27.—Consolidated Coal Company has been appointed by the court at the instance of the Consolidation Coal Company, who had been advised by a three State mine inspectors named above that the use of open lamps in these mines was dangerous, and that their use should be discontinued owing to the presence of gas in the mines. The inspectors stated that gas was being generated in various parts of the mines and that it might be carried through the mine by the ventilating apparatus and cause an explosion. The inspectors also stated that the methods used by the miners in blasting were unsafe. After this report the company requested another inspection of the mines from Hon. James E. Rodger, chief of the State Department of Mines, which was granted, and the inspectors reported that there was gas in the mines but that safety lamps and permissible explosives were in use.

After the filing of the second report, the company appealed to the Court stating that they made weekly analyses of the air in the mines and that these analyses failed to show the presence of gas in dangerous quantities. Inspectors Evans, Rose and Knapper, by their attorney, today filed a motion to strike off the appeal and set aside the finding of Examiners Fluck, Good and Rose, and Judge Keefer fixed May 26, at 10 o'clock as the time for a hearing in the matter.

SOLD BY

THE COURIER, CONNELLSVILLE, PA.

The Connellsburg Manufacturing & Mine Supply Company,

CONNELLSVILLE, PA.

Sole manufacturers of the Lepley patents and designs, covering a full line of Modern High Grade Mine Equipment Machinery

We have the largest and best equipped mine equipment plant in Western Pennsylvania, fitted exclusively for the production of a high grade product. We manufacture

PUMPS.

ENGINES.

FANS.

Air Compressors.

Steel Hoisting Cages.

STEAM, COMPRESSED AIR OR ELECTRIC. SINGLE, DUPLEX OR TRIPLEX PATTERNS. WOOD LINED, BRONZE OR CAST IRON FITTED FOR MINE, TANK OR MILL SERVICE.

HOISTING, HAULING OR STATIONARY. FIRST MOTION OR GEARED.

HEAVY STEEL PLATE CONSTRUCTION FOR HIGH DUTY SERVICE.

BLOWING, EXHAUST OR REVERSING.

DRIVEN WITH PLAIN SLIDE VALVE, PISTON VALVE OR CORLISS ENGINES.

SINGLE OR DUPLEX PATTERNS.

SIMPLE OR COMPOUND.

PLATFORM AND SELF DUMPING.

LARRIES, SCREENS, CHUTES, BULL WHEELS, HEAVY GEARS AND SPECIAL MACHINERY.

We manufacture not but the highest grade machinery, using only the best materials to be found in the market in its construction.

We are also prepared to accurately duplicate promptly any part of any of our machines.
